International Display Works is a global company with agents in throughout the world.

The production is based in Vilnius, the capital of Lithuania, a member of the European Union.

Our leading technology, the use of innovative materials and the geographical position of the company give us the advantage of a very quick lead time.

Our products are manufactured from 100% recycled materials according to the standards of the European Union.

In this catalogue, we present system mannequins, but we prefer to develop and manufacture custom-designed products.

Therefore, 95% of our production is custom-made.
